## Introduction and Contents

**As Chairman of BMF Thames Valley, I am immensely proud to introduce the 2012/13 Cruising Guide to the River Thames and its connecting waterways. The Cruising Guide has been jointly produced with the Environment Agency and is supported by the Port of London Authority - it provides all the relevant information anyone would need whilst boating on The River Thames and its connecting waterways.**

BMF Thames Valley is a Regional Association of the British Marine Federation, the National trade association for the leisure boating industry. BMF Thames Valley represents around 200 businesses that all share a passion for our inland waterways. 2012 is going to be an exciting year on the River Thames with the London 2012 Olympics and the Diamond Jubilee celebrations.

### What's new for 2012!

- New map design
- Complete map of navigable River Thames from Lechlade to the Thames Barrier
- Information on the non-tidal Thames - Environment Agency
- Information on the tidal Thames - PLA
- A boaters code of conduct - Thames MotorBoaters Association
- 2012 cruising guidance

### You will still find all the previous useful information such as:

- Services and facilities guide
- Directory of services
- Connecting waterways information
- Points of interest

I hope you use this guide throughout your time on the water and encourage you to make the most of the services on offer from BMF Thames Valley members.

Happy Boating,

*Mike Gates*

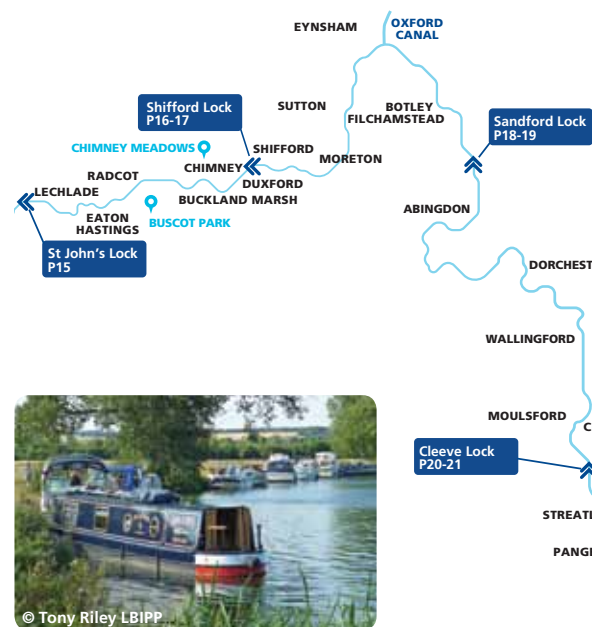

Mike Gates CMM, Chairman

# The River Thames - Who manages the river

## 2012 Cruising Guidance

**Users of the River Thames will need to plan ahead and book early this summer.**

From late July to early September 2012, the Olympic and Paralympic rowing and canoeing events will take place at Eton College's Dorney Lake, located adjacent to the River Thames, in Buckinghamshire.

The Environment Agency is working closely with the London Organising Committee of Olympic Games (LOCOG) and Thames Valley Police to achieve a shared ambition of delivering a 'safe and secure' Games.

The river remains open for navigation throughout the games, however there will be some restrictions on the Dorney reach between Boveney and Bray Locks and the whole width of the river may not always be available.

All short-stay moorings between these locks will be suspended between July and September 2012. Moorings will only be available at Bray, Windsor and Windsor Racecourse Marinas. Visitor moorings in the Windsor and Maidenhead area are likely to be extremely busy during the games, so we advise you to plan early.

There will be heightened security measures in place during the games and additional visiting boats are expected during this period, please be prepared for some possible minor delays as you enter the non-tidal River Thames at Teddington Lock.

Keep up-to-date with what's happening including any restrictions at: [www.environment-agency.gov.uk/thamesolympics2012](http://www.environment-agency.gov.uk/thamesolympics2012)

## Non-tidal River Thames

The Environment Agency manages the non-tidal section of the River Thames and its principal aims are to protect and improve the environment, and to promote sustainable development of the waterway.

## Tidal River Thames

The Port of London Authority (PLA) manages the tidal section of the River Thames, keeping leisure and commercial users safe, and protecting and enhancing the environment and promoting the use of the river for travel and trade.

The PLA is working closely with several agencies to ensure all recreational users navigating the Thames and Medway in 2012 experience a safe and enjoyable Olympics.

The tidal Thames is the UK's second biggest port and busiest inland waterway, and the Olympic Games will attract millions of visitors. The tidal Thames cannot accommodate significant numbers of additional, unplanned recreational vessels.

If you are planning to bring a recreational boat to London this summer, it is essential that you pre-book and confirm a mooring before you begin your journey. Mooring and boating facilities are very limited in ports, marinas and inland waterways on or near the tidal River Thames.

If you don't have a confirmed mooring in London, you will be asked to leave the area for your own safety, that of other recreational users and the safety

of commercial shipping. This is regardless of whether you are coming from the sea or through the UK's inland waterway network. You should also be aware that anchoring is not permitted in the Thames above Gravesend and should not be regarded as an alternative to having a confirmed, dedicated mooring.

The Port of London Authority will establish Gatekeeper Patrols in the Gravesend area, and between Teddington and Richmond to support navigational safety and to check that arriving recreational craft have a confirmed mooring to go to; and to monitor the movement of vessels passing directly through the port, which will not require a mooring.

For available moorings visit: [www.whichmarina.co.uk](http://www.whichmarina.co.uk) or for general port information, see [www.pla.co.uk](http://www.pla.co.uk)

## Narrowboats

- The Trent & Mersey
- 2 - 8 guests
- Day hire
- Short breaks
- Holidays
- All year round

## Yachts

- Sailing in Turkey
- 2-8 guests
- All inclusive with Skipper
- Holidays

## River Cruisers

- Cruise The Thames
- 2-6 guests
- Day hire
- Short breaks
- Holidays
- All year round

Personal service guaranteed, visit our website or call for a chat, about that perfect boating holiday.

# Non-tidal River Thames

[www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

## Who manages the River Thames?

The Environment Agency manages the non-tidal River Thames from Cricklade in the Cotswolds to Teddington on the outskirts of London, including the 44 locks. There is much to explore as the River Thames runs through 3 Areas of Outstanding Natural Beauty and some of England's most picturesque towns. To find out more about our service to customers on the non-tidal River Thames, read our customer charter [www.environment-agency.gov.uk/thamescustomercharter](http://www.environment-agency.gov.uk/thamescustomercharter)

## Do I need to register my boat?

All boats kept or used on the River Thames (including backwaters and marinas) must be currently registered with the Environment Agency. Visit [www.environment-agency.gov.uk/boatregthames](http://www.environment-agency.gov.uk/boatregthames) for more information.

If you are visiting the River Thames from another waterway for a short period, you are eligible for a visitor registration. You can buy one in advance by post or from a number of River Thames locks during published hours of duty. Visit [www.environment-agency.gov.uk/boatregthames](http://www.environment-agency.gov.uk/boatregthames) for more information.

Hire boat customers should discuss registration with their hire company in advance.

## How do I stay safe on the water?

The Environment Agency wants you to enjoy your time on the river; this information will help you to stay safe while using the river.

- We recommend life jackets or buoyancy aids should always be worn, especially by children and non-swimmers. If you're on a hire boat your boatyard will provide them.
- Wear suitable footwear (no flip-flops or high heels) with non-slip soles.

- Children should always be supervised. Know where they are at all times and don't let them sit in positions where a turn, change of speed or wash from another boat could toss them into the water.
- Always use grab rails when moving around the boat, and never run or jump.
- Be careful when passing through low bridges and ensure everyone on board is in a safe position. Some hire boats will not pass under Folly Bridge or Osney Bridge, Oxford – please check with your boatyard.
- Ensure your boat systems (engine, fuel, gas and electrical) are properly maintained and serviced according to manufacturer recommendations.
- Take care when refuelling, especially with petrol (petrol vapour is heavier than air and does not readily disperse if there is a spillage or a leak). Before refuelling, switch off your engine and extinguish all cigarettes and naked flames. Ensure all cooking, heating and lighting appliances are turned off. To ensure the fuel system is not overfilling, monitor the fuel level carefully. Any portable fuel tank connected to an outboard motor must be removed from the boat for filling. Mop up any spillage and ventilate the boat before starting the engine or using naked flames.

- Never go afloat or leave a safe mooring without checking the local conditions.

Extra safety information for hire boaters.

- Your boatyard should supply a skipper's handbook on board your boat, please read it carefully to ensure a safe and trouble-free holiday.

# Non-tidal River Thames

[www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

## How do I know what the river conditions are?

Any river activity poses a greater risk when there are strong currents, higher river levels or cold weather conditions. Flows can increase even during the summer months – never assume sunny weather means the conditions are not hazardous.

Warning boards may be displayed at locks to inform river users of the conditions. Read the following explanation of what these mean for you. Do not take risks and never underestimate the power of the river.

### CAUTION STRONG STREAM

When these red boards are displayed on lock gates, they advise users of **all boats** not to navigate because the strong flows make it difficult and dangerous.

**Those in hire boats arriving at a lock where these boards are displayed should stop immediately and contact their hire boat operator to ask their instructions.**

### CAUTION STREAM INCREASING

When these yellow boards are displayed on lock gates, they advise users of all **unpowered boats** not to navigate and users of **powered boats** to find a safe mooring. This is because river flows are likely to strengthen and red boards could be displayed very soon and without warning.

### CAUTION STREAM DECREASING

When these yellow boards are displayed on lock gates, they advise users of all **unpowered boats** not to navigate and users of **powered boats** to navigate with caution.

You can keep up-to-date with river conditions and strong stream warnings in the following ways:

- Call the Environment Agency Floodline on 0845 988 1188 to hear recorded information and advice (select option 1 and when prompted dial 011131).
- Visit the Environment Agency website [www.environment-agency.gov.uk/riverthamesconditions](http://www.environment-agency.gov.uk/riverthamesconditions)
- Talk to one of the Environment Agency's lock staff who will be able to give advice on local conditions and moorings.

## How do I deal with changing river conditions?

If you find yourself in conditions where the Environment Agency advises you to stop navigating, read this section carefully. Remember, not all conditions will be serious enough to require all the measures suggested below.

- **Please** take the advice to stop. Even the most experienced boater can be caught out so think about those who could be put in danger if they have to help you.
- Moor your boat in a safe place, preferably in a marina or at a recognised mooring. Limited space may be available at some locks. Moor against high banks if you can.
- Ensure your mooring lines are fastened to secure fixings such as bollards, rings or even trees. Put out extra lines for additional security and allow enough slack for a further rise in river levels. Do not rely on your own mooring pins/stakes as they might not hold.
- If possible, put extra fendering (e.g. scaffold poles or strong timber posts) between your boat and the bank side to prevent it drifting onto the river bank and becoming caught up when levels drop.

- **Make sure you have a safe exit ashore from your boat.** If not, you should consider returning home or finding alternative accommodation until conditions improve.
- If you are running low on essential supplies or have other safety concerns and are not able to vacate your boat safely, you should treat this as an emergency and **dial 999** to ask for evacuation.
- For hire boaters, if you are advised to stop, you **MUST** call your boatyard and follow their instructions.

## What are the rules of navigation for all boats?

Obey the rules of navigation and byelaws, available online at [www.environment-agency.gov.uk/boatingbyelaws](http://www.environment-agency.gov.uk/boatingbyelaws)

- Stay within the main river channel and follow all directional arrows. If you navigate away from the marked channel (e.g. up backwaters or weir streams) you risk running aground and damaging the boat.
- Steer on the right where it is safe and practical. Remember even when you have right of way it's your responsibility to avoid collision.
- Avoid turning your boat near bridges, bends and locks. Do not turn across the bows of oncoming boats; wait until it is safe.
- Near bridges or sharp bends, boats going upstream must give way to boats coming downstream.

- Always take care when overtaking and keep clear of other boats.
- Keep a sharp look out at all times for any hazards, taking action when necessary. If in doubt, slow down or STOP.
- Respect warning signs. It is dangerous and illegal to interfere with weir gates and sluices. In an emergency **call 999**.
- Obey River Thames short stay mooring requirements, you can download a helpful fact sheet for more information [www.environment-agency.gov.uk/thamesmoorings](http://www.environment-agency.gov.uk/thamesmoorings)
- Hire boats should not navigate between the hours of sunset and sunrise without permission from the hire boat operator and only if fitted with the correct navigation lights.

## What is the speed limit?

The maximum speed for powered boats upstream of Teddington is 8 kilometres per hour (approx. 5 mph or a fast walking pace) over the bed of the river. Unlike a car, a boat will not 'stop in seconds' so needs a longer stopping time.

- Accidents occur more frequently at high speed, particularly from wash. Keep a check on your wash; it is often sensible to stop briefly to allow it to settle to an acceptable level.
- Wash will increase when travelling in convoy, even at a slow speed. Do not travel in a convoy if the wash created is too great.
- Do not let time rule your journey. It is an offence to navigate without care and caution, or in a manner likely to endanger the safety of others, the banks of the river or moored boats.

**PLEASE REMEMBER YOUR LIFE IS MORE IMPORTANT THAN YOUR BOAT.**  
The Environment Agency is not an emergency service and we are not able to carry out search and rescue or provide supplies to stranded boats.

**THINK AHEAD AND  
SLOW DOWN TO  
AVOID ACCIDENTS**

# Non-tidal River Thames

[www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

## What equipment do I need to have onboard?

We recommend you carry the following equipment aboard your boat, stream conditions can change while you are afloat so it is important you and your boat are prepared by following these guidelines:

- Fire extinguishers must be carried. The number and size needed depends on the size of the boat (for details see [www.boatsafetyscheme.com](http://www.boatsafetyscheme.com))
- A horn or whistle must be fitted to all motor boats.
- An anchor is your lifeline – carry at least one, preferably two. You may need to use them if your engine or steering gear fails. Your anchor should always be accessible. When anchoring with chain cable, use at least three times the depth of water. If using synthetic warp, use about five times the depth.
- Carry a first aid box, have some basic first aid knowledge and learn how to cope in an emergency.
- Bilge pumps or balers for emptying water from your boat should be carried.
- You should have at least two mooring lines (front and back). The minimum length should be 7 metres. Keep extra ropes on board for more secure mooring.
- Carry a life jacket or buoyancy aid for every person on board.
- Keep supplies of long-life provisions and plenty of drinking water on board.
- Keep your fuel tanks topped up.
- Empty your toilet holding tanks regularly. It may also be useful to keep a portable chemical toilet on board.
- Keep a fully charged mobile telephone on board if possible.

## Are there lock keepers to help me?

Yes, there are trained, helpful and friendly staff on duty at locks to maintain the lock site and help boaters. When they are not available to help, blue 'self service' signs are displayed.

## How do I stay safe at locks?

- In narrow lock cuts, please remember some boats draw up to 1.2 metres (4 feet) or more and might not be able to manoeuvre quickly.
- When waiting for a lock, form an orderly queue at the lay-by moorings as near to the lock as possible. Queue jumping is bad mannered – it arouses ill feeling and can cause confusion and delays entering the lock.
- Once the lock is full, any remaining boats should move forward along the lay-by to ensure those waiting in the channel (perhaps in difficult conditions) can moor at the back of the queue.
- Obey the lock keeper's instructions. For both safety and efficiency reasons they may not necessarily instruct boats to enter the lock in strict order of arrival.
- Always bring your boat to a complete standstill using reverse gear – not the ropes.
- **Never** jump from the boat onto the lay-by or lock side – this is the most likely cause of an accident and the easiest to avoid.
- Please don't throw your lines directly at lock staff, pass them.
- Stop your engine once the boat is moored in the lock. Turn off radios and other music or noise.
- Use both bow and stern lines (not just a central line), pass them around the bollards and keep hold of them. When water is rising or falling in the lock, adjust your lines to keep them fairly taut. Make sure your boat does not become caught up as the lock is emptying.

- Coil lines ready for use and do not let them trail in the water, as they may get wrapped around your propeller. Tangled lines also cause problems, especially if needed in a hurry.
- Never wrap a rope round any part of your body and keep hands and fingers away from bollards or cleats.
- Do not fend off with hands, feet or boat hooks.
- Do not open fuel tanks or strike matches.
- Do not moor upstream of the vertical white line on the lock wall or your boat may be damaged.
- Be aware of bollards, steps and other tripping hazards.
- Do not run on the lock side or allow others to run.
- Keep children under close supervision.
- Take your time and pay attention while going through the lock.
- Please keep dogs on your boat, or on a lead whilst passing through the lock.

- Lock keepers' hours of duty are displayed at locks and on the website at [www.environment-agency.gov.uk/thameslocks](http://www.environment-agency.gov.uk/thameslocks)
- When the locks are unattended, you may work them yourself, at your own risk. Many locks have power making them easier to operate; the operating instructions are displayed at the lock.

## If you are operating the lock yourself, follow these guidelines:

- Read and understand the operating instructions before you start.
- Stay close to the sluice controls whilst the sluices are in operation.
- Lock gates must always be properly closed before slowly opening the sluices to fill or empty the lock. After use, leave the lock empty and the gates shut, as in many cases there is a public right of way over the gates.
- In an emergency you should close all sluices before dealing with the situation.
- Emergency contact details are displayed at each lock.

## What are the maximum dimensions for boats?

This table shows the maximum recommended boat dimensions, in metres (m), for sections of the River Thames. Boating customers also need to be aware of bridge heights and lock dimension information, for details visit [www.environment-agency.gov.uk/riverthames](http://www.environment-agency.gov.uk/riverthames)

River section	Length (m)	Beam (m)	Draught (m)
Cricklade – Lechlade	Normally suitable for small boats only (for example canoes), subject to river conditions.		
Lechlade Bridge – Folly Bridge, Oxford	30.5	4	0.9
Folly Bridge, Oxford – Reading Bridge	33.5	5	1.2
Reading Bridge – Windsor Bridge	37	5	1.3
Windsor Bridge – Staines Bridge	54	7	1.7
Staines Bridge – Teddington	53	6	2

# Non-tidal River Thames

[www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

## Where can I moor?

If you keep, or mainly use your boat on the River Thames you should have a base mooring.

There is a good choice of public short stay moorings for boaters to use while cruising the river. Unless signs state otherwise you are only allowed to moor for a maximum period of 24 hours and may have to pay a charge at some sites.

- Always respect private rights and, when in doubt, obtain permission from the owner of the bank before mooring up.
- Place mooring stakes well back from the bank edge and make sure they do not cause a hazard to passers-by.
- Gaps between boats are wasteful so please share rings or posts where possible.
- Moor alongside other boats where possible to maximise mooring space.
- You may land on or embark from the towpath, but there is no right to moor up to private towpath property without the landowners' consent.

When stopping overnight or leaving your boat for any considerable time, do not moor in shallow water or with a tight rope or chain as water levels may fluctuate by as much as 1 metre in a few hours. If the level drops and your boat is beached or moored in shallow water, it may be damaged. If the level rises, and mooring ropes or chains are tight, your boat may take on water, be pulled under or break free.

For more information on the availability of long or short stay moorings, visit [www.environment-agency.gov.uk/thamesmoorings](http://www.environment-agency.gov.uk/thamesmoorings)

## Where can I launch a small boat?

There are a number of slipways and launching sites for small boats along the River Thames.

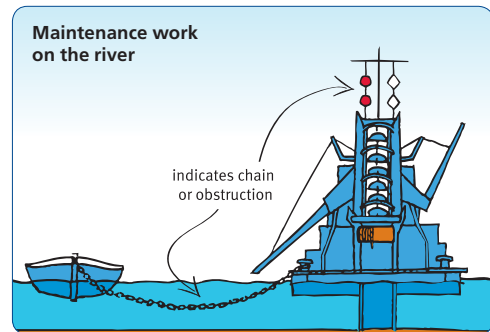

Some are at boatyards and available for a charge during working hours only whilst others are free and accessible at all times.

For more information about moorings and slipways go to [www.environment-agency.gov.uk/thameslipways](http://www.environment-agency.gov.uk/thameslipways)

## Maintenance work on the river

When maintenance work is carried out on the river, it may be necessary to moor plant and barges where they might present a hazard; always try to anticipate the unexpected.

- A diver's flag (International Code Flag A) indicates that divers are in the water.
- Yellow buoys mark dredgers' anchors. Slow down and navigate past the dredger on the side showing two all-round GREEN lights or two white diamonds in a vertical line. Two all-round RED lights or two RED balls in a vertical line mark the side where chains and other obstructions may exist.
- Allow plenty of room for tugs and barges to manoeuvre in lock cuts and other narrow channels. Laden barges need deep water and may swing wide on bends. Take care not to pass between a tug and its tow. A tug with a tow may display a flashing amber light.
- For information about river works and any lock closures, call our Floodline on 0845 988 1188 (select option 1 and when prompted dial 011132).

## Will there be any obstructions on my journey?

### Marking obstructions

The diagram below shows the system of marking for shoals and other obstructions on the River Thames.

The four shapes of top marks used – can, triangle, sphere and two spheres – are shown, together with directions for passing them safely when going upstream. When going downstream the reverse applies.

- Wrecks or other obstructions in midstream are marked by an isolated danger buoy, which may be passed on any side. Where they must be passed on a particular side the appropriate can or triangle top marks will be used.

- In all cases boats should pass well clear of a marking buoy.
- A large RED disk usually means the navigation arch of a bridge is closed.

Note: The Environment Agency is not responsible for marking obstructions that lie outside the navigation channel. You must proceed with particular caution when approaching any bank or if you leave the main navigation channel.

### Overhead cables

In open stretches below Oxford, cables are usually 12 metres (40 feet) above summer water level – allow 4 metres (13 feet). If in doubt lower your masts or aials. Take particular care in locks, lock cuts, back waters and reaches above Oxford, where cables may be much lower.

For more detailed information about boating on the River Thames visit [www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

# Bridge Heights - Non-tidal River Thames

The information on bridge heights on the Non-tidal Thames has been supplied by the Environment Agency. For information on Tidal Thames Bridge heights, please contact The Port of London Authority [www.pla.co.uk](http://www.pla.co.uk)

74	Kingston Bridge	7.29	23'11"
75	Kingston Railway Bridge	6.81	22'4"
76	Teddington Lock Cut Bridge	5.58	18'4"

For the purposes of clarity, only the main bridges are shown on the following map pages.

# St John's Lock - Shifford Lock

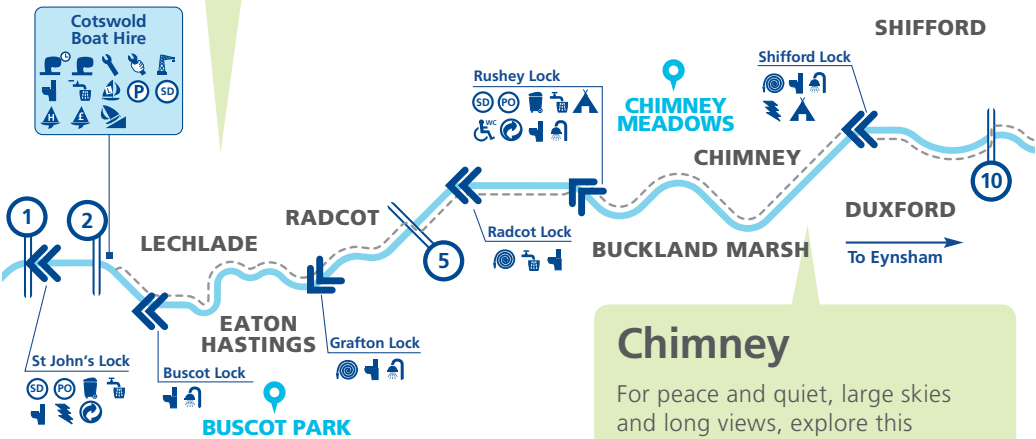

## Lechlade

This small market town is the furthest navigable upstream point of the Thames. Set in an area of outstanding natural beauty at the southern edge of the Cotswolds, Lechlade gets its name from the River Leach, which joins the Thames nearby.

[www.lechladeonthames.co.uk](http://www.lechladeonthames.co.uk)

© Environment Agency

## Chimney

For peace and quiet, large skies and long views, explore this wonderfully remote part of the Thames! Chimney Meadows Nature Reserve is a nationally-acclaimed, 250-hectare wildflower meadow that provides vital refuge for wading and ground-nesting birds including curlew, snipe and reed bunting.

Lock Name	Distance to next lock downstream		Time to lock downstream at 8kph/5mph*
St John's Lock	1.85	1.15	15
Buscot Lock	5.37	3.34	41
Grafton Lock	2.98	1.85	23
Radcot Lock	4.23	2.63	32
Rushey Lock	6.92	4.30	52
Shifford Lock	7.63	4.74	58

\*Time to Lock Downstream - Journey times are calculated based upon a downstream speed of 8km/5mph. Journey times may vary and will be higher for upstream journeys.

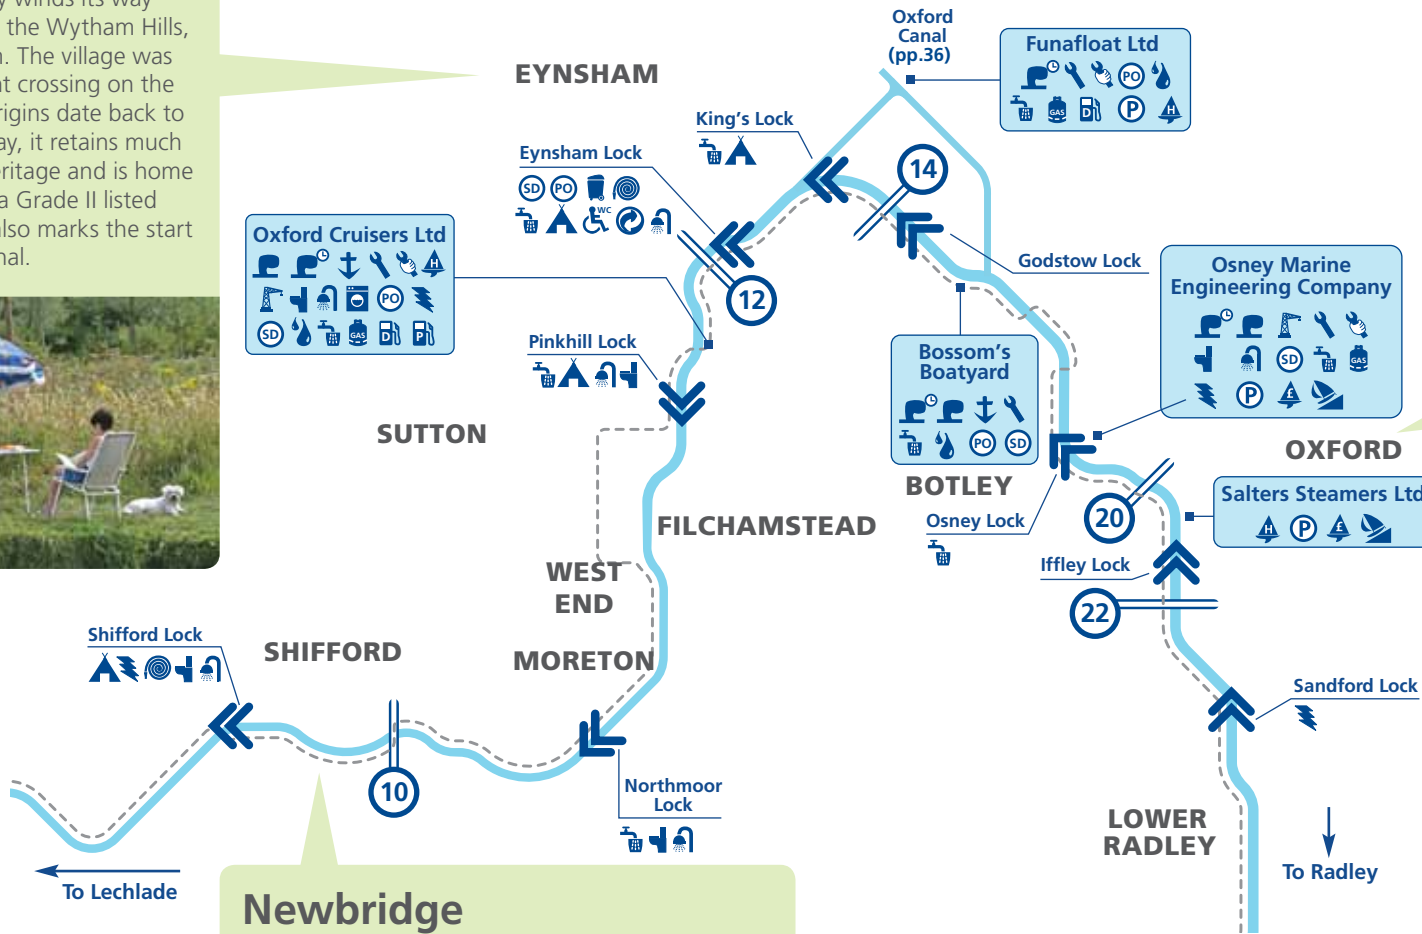

# Shifford Lock - Sandford Lock

## Eynsham

As the river slowly winds its way along the base of the Wytham Hills, it passes Eynsham. The village was once an important crossing on the Thames and its origins date back to Saxon times. Today, it retains much of its medieval heritage and is home to Eynsham Hall, a Grade II listed Manor house. It also marks the start of the Oxford Canal.

© Tony Riley LBIPP

## Newbridge

Newbridge is a popular berth for refreshments with a pub on either bank, and strong historical connections. Built over 600 years ago by monks, the bridge is claimed by some to be the oldest bridge over the Thames. During the English Civil War, the Battle of Newbridge was fought on the banks of the river - the roundheads attempted to cross the river and surround Oxford.

© Visit Britain

## Oxford

Oxford is famous the world over for its University and place in history, and has been an established town since the 9th century. Also known as The City of Dreaming Spires, it has been a home to royalty and scholars for over 800 years.

[www.visitoxfordandoxfordshire.com](http://www.visitoxfordandoxfordshire.com)

Lock Name	Distance to next lock downstream	Time to lock downstream at 8kph/5mph*
Shifford	7.63km 4.74mi	58 mins

Sandford	7.38km 4.58mi	56 mins

\*Time to Lock Downstream - Journey times are calculated based upon a downstream speed of 8km/5mph. Journey times may vary and will be higher for upstream journeys.

# Sandford Lock - Benson Lock

## Abingdon-on-Thames

Abingdon-on-Thames is one of the oldest continuously inhabited settlements in England. The traditions of the past are very much alive in Abingdon, with its Annual Michaelmas Fair, Runaway Fair and its custom of Bun Throwing from the roof of the 17th Century County Hall to celebrate important events.

[www.visitabingdon.co.uk](http://www.visitabingdon.co.uk)

© Tony Riley LBIPP

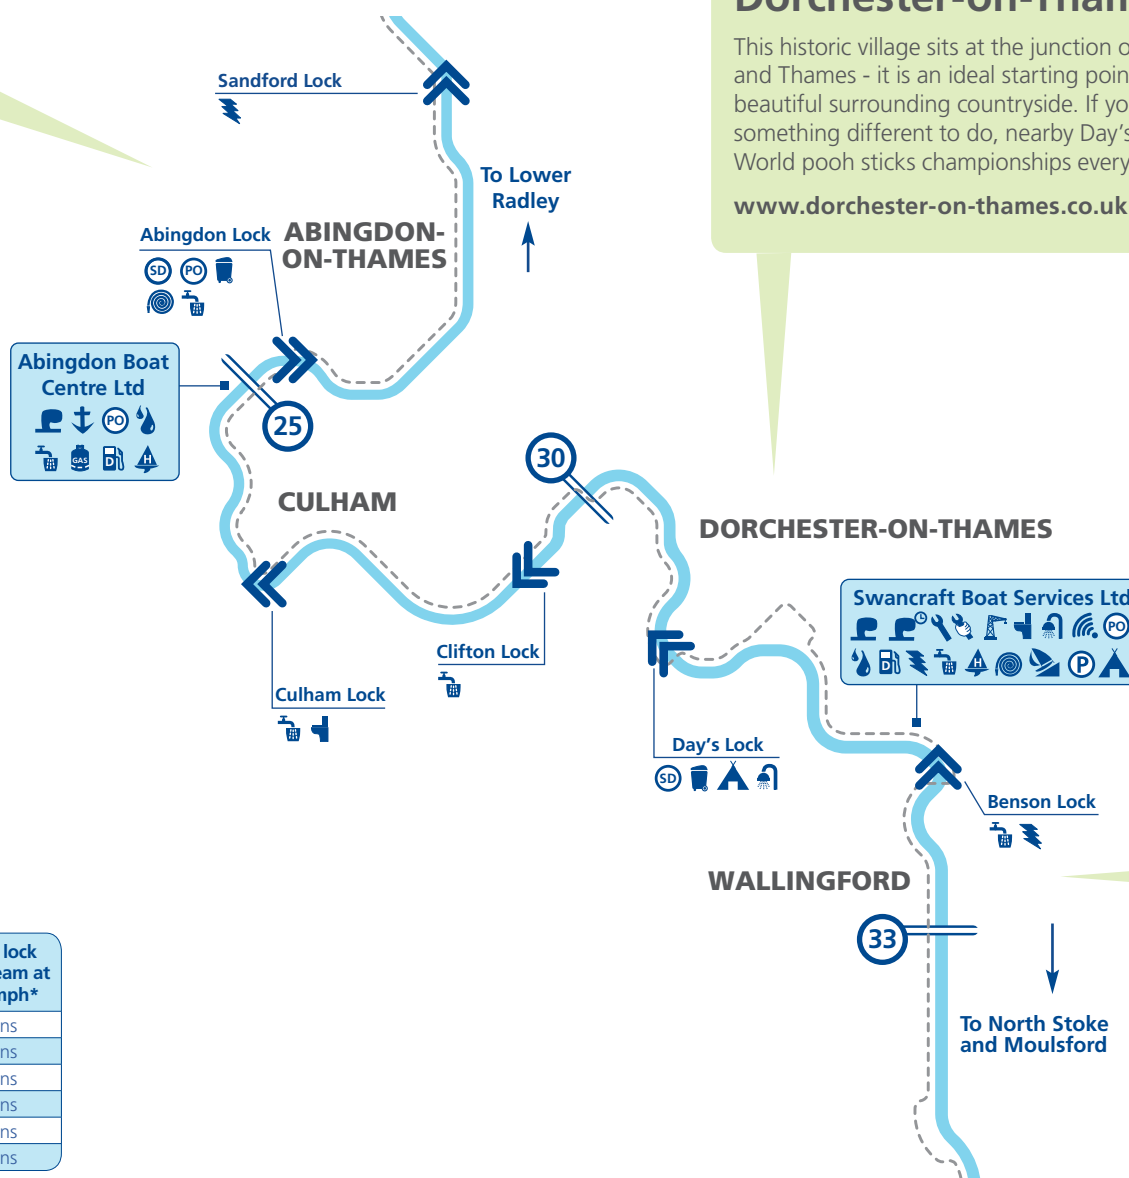

## Dorchester-on-Thames

This historic village sits at the junction of the rivers Thames and Isis - it is an ideal starting point for exploring the beautiful surrounding countryside. If you are looking for something different to do, nearby Day's Lock hosts the World pooh sticks championships every spring.

[www.dorchester-on-thames.co.uk](http://www.dorchester-on-thames.co.uk)

© Tony Riley LBIPP

## Wallingford

Wallingford is an attractive town that dates back to Caesar's time, but more recently it was home to the world-famous crime writer, Agatha Christie, who took inspiration for stories such as Miss Marple. It is also the location for the TV series Midsomer Murders.

[www.wallingford.co.uk](http://www.wallingford.co.uk)

# Cleeve Lock - Sonning Lock

© Tony Riley LBIPP

## Goring

This pretty town sits between the Chilterns and the Berkshire Downs within a designated Area of Outstanding Natural Beauty. It is also the site of the ancient tradition of the Swan Uppers. In July, rowing skiffs manned by the Vintners' and Dyers' City of London livery companies arrive – the Swan Uppers have been charged for hundreds of years with counting the swans between Sunbury and Abingdon.

[www.goring-on-thames.co.uk](http://www.goring-on-thames.co.uk)

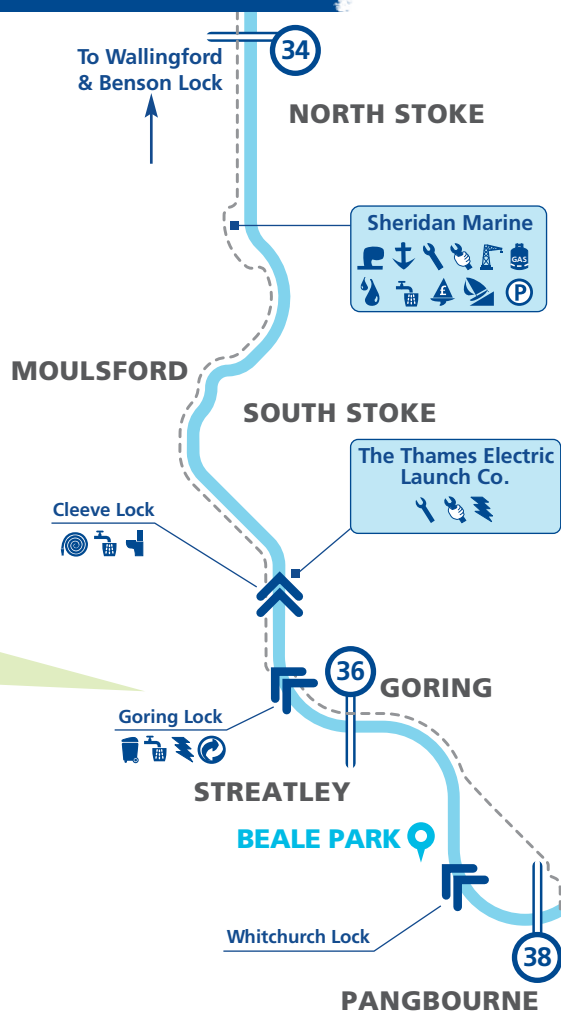

© Tony Riley LBIPP

## Reading

Reading is now one of the largest towns in the UK with an energetic atmosphere to match – it hosts one of the biggest and longest running music festivals in the UK, The Reading Festival.

[www.livingreading.co.uk/visit.html](http://www.livingreading.co.uk/visit.html)

© Tony Riley LBIPP

## Mapledurham

Mapledurham is one of the most picturesque spots on the Thames with views of Mapledurham House and the last working mill, which still produces stone-ground flour.

[www.mapledurham.co.uk/index.php](http://www.mapledurham.co.uk/index.php)

Lock Name	Distance to next lock downstream	Time to lock downstream at 8kph/5mph*

## Henley-on-Thames

Henley nestles in a beautiful Chiltern valley surrounded by green fields and wooded hills with wonderful views of the Thames Valley. As well as hosting its annual Royal Regatta, Henley also attracts some of the world's top entertainers to music festivals including the Henley Festival of Music & Arts and the Rewind Festival.

[www.henley-on-thames.org](http://www.henley-on-thames.org)

Lock Name	Distance to next lock downstream		Time to lock downstream at 8kph/5mph*
Sonning	4.68km	2.91mi	36 mins
Shiplake	4.80km	2.59mi	36 mins
Marsh	4.59km	3.24mi	35 mins
Hambleden	5.89km	3.66mi	45 mins
Hurley	1.03km	0.64mi	8 mins

Marlow	6.44km	4.00mi	49 mins
Cookham	3.35km	2.08mi	26 mins
Boulter's	3.43km	2.13mi	26 mins

\*Time to Lock Downstream - Journey times are calculated based upon a downstream speed of 8km/5mph. Journey times may vary and will be higher for upstream journeys.

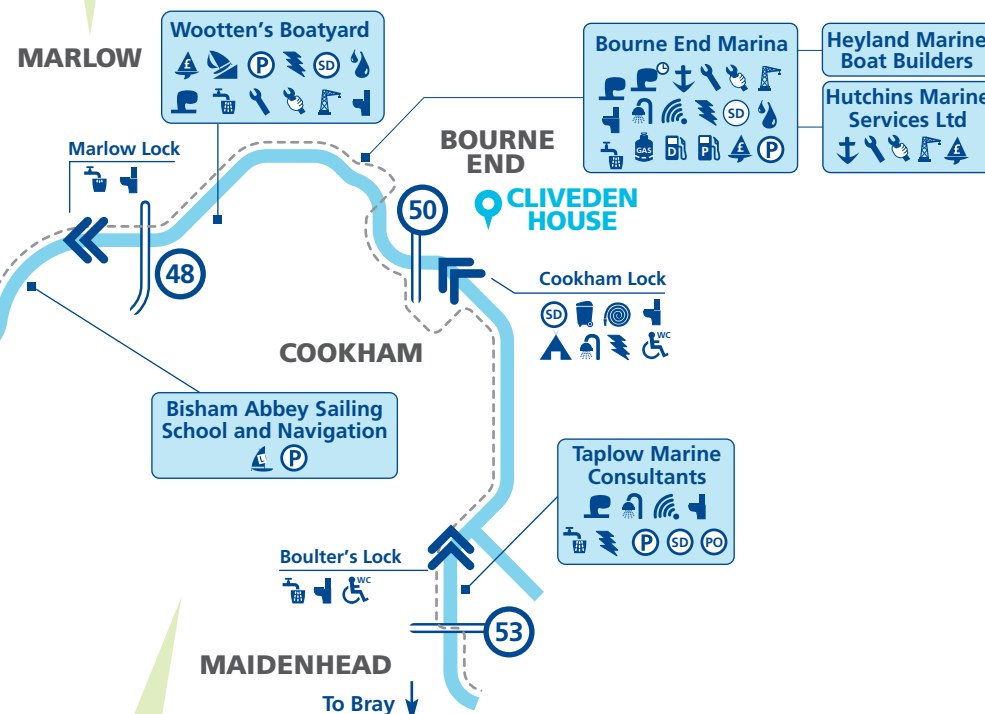

## Marlow

This charming market town is clustered around the river - It's graceful suspension bridge, the flowing weir, the spire of the church and the famous Complete Angler Hotel make this the perfect place to enjoy everything the river has to offer.

[www.marlowtown.co.uk](http://www.marlowtown.co.uk)

© Tony Riley LBIPP

## Cookham & Cliveden

As the river snakes past Cookham, the beechwoods rise steeply and you will see the Cliveden Estate. A country retreat on a grand scale, it was once the glittering hub of society; visited by virtually every British Monarch since George I.

[www.nationaltrust.org.uk/cliveden/](http://www.nationaltrust.org.uk/cliveden/)

# Boulter's Lock - Old Windsor Lock

Boulter's Lock © Tony Riley LBIPP

## Maidenhead

Located on the banks of the Thames, Maidenhead is an ancient town with a history going back to early Saxon times, and this bustling town is now a centre of rowing excellence.

[www.maidenhead.net](http://www.maidenhead.net)

© Tony Riley LBIPP

## Windsor

Cruising past the racecourse and Eton's meadows, the royal town of Windsor comes into view. Everything in Windsor revolves around the castle, a royal residence for over 900 years, and the changing of the guard is a highlight. This popular historic town's other attractions include the Theatre Royal, Windsor Great Park, The Savill Garden, Ascot Racecourse, Royal Windsor Racecourse and excellent shopping, bars and restaurants.

[www.windsor.gov.uk](http://www.windsor.gov.uk)

## Dorney Lake & The 2012 Olympics

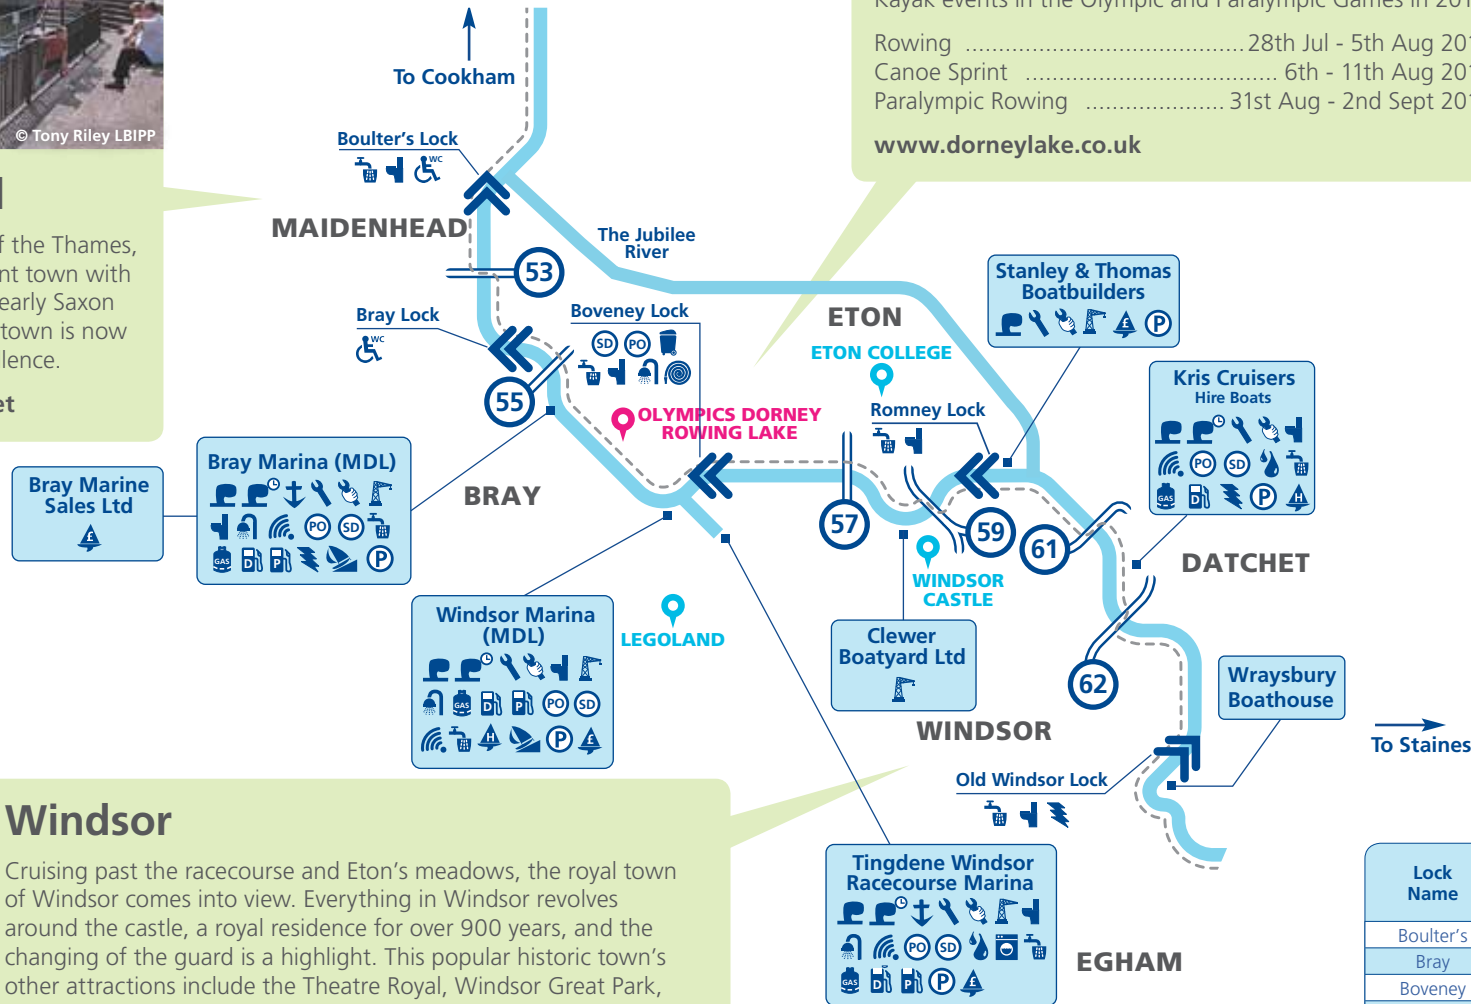

Dorney Lake is a modern world-class rowing and canoeing centre near Windsor. It is the venue for the Rowing and Kayak events in the Olympic and Paralympic Games in 2012.

Rowing ..... 28th Jul - 5th Aug 2012  
Canoe Sprint ..... 6th - 11th Aug 2012  
Paralympic Rowing ..... 31st Aug - 2nd Sept 2012

## Runnymede

This historic water-meadow alongside the Thames makes a great place to moor up and enjoy a stroll or reflect on world history. It was here in 1215 that the Magna Carta was sealed - this charter laid down the foundations of much of our current common and constitutional law as well as Parliament. The meadows are also overlooked by the Commonwealth Air Forces Memorial and the Kennedy Memorial, an acre of England given to the American people.

[www.nationaltrust.org.uk/runnymede](http://www.nationaltrust.org.uk/runnymede)

## Staines-on-Thames

As you approach Staines Bridge you might glimpse the London Stone from which Staines said to derive its name on the bankside. This was originally placed here in 1285 and marks the former western limited jurisdiction of the City of London over the River Thames. There are public moorings at the landing stage near the Town Hall and the memorial Gardens.

## Sunbury-on-Thames

The ancient Bronze Age riverside settlement now forms an attractive leafy suburb of London. Sunbury is the home of the London Irish Rugby Club and just to the east lies Kempton Park Racecourse, which stages both National Hunt and Flat racing.

[www.touruk.co.uk/surrey/Sunbury-on-Thames.htm](http://www.touruk.co.uk/surrey/Sunbury-on-Thames.htm)

Sunbury Lock ©Tony Riley LBIPP

## Kingston-upon-Thames

Kingston-upon-Thames was once the coronation place of Saxon Kings (902 -978) and marked the beginning of Jerome K Jerome's Three Men in a Boat. Today, this busy market town has developed into a major shopping and entertainment hub although it retains much of its original charm.

# The Tidal Thames

**The Port of London Authority (PLA) is the harbour and navigational authority for the tidal Thames below Teddington, through to the Thames Estuary. The PLA's primary role is the management of navigation and promoting the safe use of the tidal Thames. It also maintains and operates the half-tide lock at Richmond.**

Although we oversee the running of Britain's second biggest port and busiest inland waterway, we also take pride in a river that's a centre of excellence for rowing; a home to around 70 leisure craft clubs; facilities and marinas; an iconic destination for visiting boats; and host to 50 sporting events every year. We believe passionately in a Thames that's accessible for all responsible river users, and we work closely with commercial, recreational, community and amenity groups to make this happen. The river is our most precious asset; we want you to enjoy it to the full - in safety.

## Contact:

**Port of London Authority**  
London River House, Royal Pier Road,  
Gravesend, Kent DA12 2BG  
Tel. +44 (0)1474 562200  
Fax. +44 (0)1474 562281

**Vessel Traffic Services (VTS) Enquiries**  
Port Control Centre, Gravesend  
+44 (0)1474 562215

**Thames Barrier Navigation Control**  
Woolwich  
+44 (0)20 8855 0315

In addition, we produce an annual Recreational Users Guide - in sheet form, on waterproof paper, which can be obtained free of charge from our main offices at Gravesend, our London office, the Harbour Service patrol or the lock foreman at Richmond Lock.

## Tidal Thames Cruising Times between Bridges

**Time to Bridge Downstream - Journey times are calculated based upon a downstream speed of 8km/5mph. Journey times may vary and will be higher for upstream journeys.**

## Teddington Lock

Teddington Lock is the first and largest lock on the Thames, and marks the point that the Thames becomes non-tidal and tidal. Hire boats should not proceed beyond this point without the permission of the hire company.

© Environment Agency

## Richmond

Richmond is one of London's most attractive boroughs, and has been a favourite retreat of royalty, the rich and the famous for hundreds of years. With beautiful royal parks, historic houses such as Kew Gardens and Syon House, theatres, museums and galleries rich with exhibits and a town centre bursting with shops and restaurants, Richmond rivals anywhere in London.

00 indicates a bridge position. For a full list of bridges and bridge cruising times, please refer to page 31.

# Connecting Waterways

## Oxford Canal

The picturesque Oxford Canal meanders slowly from Oxford to Coventry through 77 miles of classic scenery, much of which has barely changed in centuries.

It was briefly the principal waterway from London to the Midlands, but was superseded by the more direct Grand Union Canal. Consequently, the Oxford Canal has escaped large-scale development and few towns have sprung up on its banks.

The southern section is particularly charming and remains largely unaltered.

### Waterside Services

Funafloat Ltd

Osney Marine Engineering Co.

## Kennet & Avon Canal

The Kennet & Avon Canal weaves through spectacular scenery between the Thames and the Bristol Avon, as natural rolling landscapes of the Cotswolds give way to the World Heritage Site of Bath.

The route of the Kennet & Avon takes it through some of the nation's best loved landscapes, passing Areas of Outstanding Natural Beauty and habitats that are rich in flora and fauna. Today the canal is home to a wide range of leisure activities. From cycling and walking to wildlife watching, boat trips, museums and tearooms, there is much to explore.

## River Wey

In 1653, a century before the canal age really took off, enterprising land owner Sir Richard Weston opened the River Wey for navigation, linking Guildford with the Thames and London, by straightening out the windy bits of the river.

The Wey is now used for pleasure boating, from holiday boats to rowing skiffs and trip boats, and passes through twenty miles of Surrey's finest countryside from Godalming to the Thames at Weybridge. Never far from civilisation but thoroughly rural in character, the Wey meanders through Areas of Outstanding Natural Beauty and gives you picturesque locks, water meadows, woods and wildlife.

## Grand Union & Regents Canal

The trunk route of Britain's canal network, the picturesque Grand Union links London through the Chilterns with Birmingham via the longest single canal in Britain. As the main line from London to the Midlands, the Grand Union Canal was once one of the busiest in the country. Today, its charm lies in its diversity: from the centre of London through the Chiltern Hills, rural Northamptonshire and Warwickshire, and into the suburbs of Birmingham.

## THAMES VOYAGES LTD

[www.thamesbrokerage.net](http://www.thamesbrokerage.net)

A friendly, family run Boatyard located just half a mile downstream of Hampton.

Our pretty boathouse. From here we can offer all boatyard services including moorings.

Dedicated Boat-sales area with experienced & knowledgeable staff on duty.

Slipway available for service work, antifouling, valeting etc, all at competitive rates.

Terrace Gardens Boat Yard, Hampton Court Road  
Hampton, Middlesex, TW12 2EN. Tel: 0208 979 3433  
sales@thamesbrokerage.net

The Gold Anchor Award Scheme is an assessment programme designed by The Yacht Harbour Association with contribution from the RYA that gives boat owners assurance of customer service and quality.

With 24 years experience of Gold Anchor standards, this is a point of reference for all boat owners to make an informed decision on where to berth.

Ratings range from one to five gold anchors. Any award issued is a sure sign of a credible and quality marina with the number of anchors indicating the facilities and services available to berth holders.

## The Association of Thames Yacht Clubs (ATYC)

The Association of Thames Yacht Clubs (ATYC) represents the interests of motor yacht clubs from Southend to Lechlade with the main focus on promoting enjoyment, skills and safety.

It also lobbies on behalf of its members on higher level issues to navigation and local authorities through to governmental bodies. It holds quarterly meetings, an Annual Dinner and a major Rally with a boat handling as the centrepiece. The venues are typically Docklands and venues further up river to Beale Park at Pangbourne.

Recently the Association has introduced the Thames Boating Certificate, available through their clubs to improve boat handling skills on the non-tidal river.

One of the key aims is to promote understanding and appreciation between all river users lucky enough to share the River Thames.

Officers attend River Users Groups and in several instances chair the meetings.

**For more information visit**

**WALTON MARINE**  
NEW & USED BOAT SALES

Walton Marine are distributors for Jeanneau NC, Leader, Merry Fisher & Cap Camarat Motor Boats. We have many models from the Jeanneau range on display.

Walton Marine offer a complete boat sales and brokerage service with a huge range of used boats for sale.

**JEANNEAU**

Call now for further details & current offers

**MERRY FISHER 755**

The new Jeanneau Merry Fisher 755 has been developed for speed, economy, and ease of handling. The living space offers excellent comfort for 4 people onboard for overnight stays with separate heads compartment, galley and sundeck area are all qualities that set her apart from everything else currently on the market. A great boat with the whole family in mind!

**MERRY FISHER 645**

Family friendly, efficient and excellent value, the Merry Fisher 645 features an interior design layout for 4 people with two double berths, a saloon with table & seating and views of the water. Large opening windows and sliding wheelhouse roof hatch. Stylish design and efficient high performance outboard engine. Easily trailable, the Merry Fisher is built for wonderful days on the water.

**MERRY FISHER 595**

The innovative Jeanneau Merry Fisher 595 responds to the needs of new customers who wish for an elegant and fast boat with enclosed steering station but not only for fishing use. Springtime & autumnal navigation, easily trailable, comfortable accommodation for occasional overnighting and large open cockpit, everything you are looking for in a 6 metre boat.

**NC11 MOTOR CRUISER**

Panoramic views of the sea from the saloon and cabins. A bright and spacious saloon entirely open to the cockpit, large glass roof with sliding opening sunroof. A galley perfectly integrated into the interior design of the saloon. Forward owners cabin with double island berth. A second cabin with 2 single berths. A head with separate shower compartment.

# Thames MotorBoaters Association River Etiquette For Boaters

## Discover the River Thames

The Cruising Guide – The River Thames and Connecting Waterways 2012-13 is brought to you by BMF Thames Valley in partnership with the Environment Agency and with the support of the Port of London Authority.

BMF Thames Valley is a Regional Association of the British Marine Federation, the national trade association for the leisure boating industry. BMF Thames Valley represents around 200 businesses that all have a passion for our inland waterways. [www.britishmarine.co.uk/cruisingguide](http://www.britishmarine.co.uk/cruisingguide)

The Environment Agency manages the non-tidal River Thames from Cricklade in the Cotswolds to Teddington on the outskirts of London, including the 44 locks. [www.environment-agency.gov.uk/boating](http://www.environment-agency.gov.uk/boating)

The Port of London Authority manages the tidal section of the River Thames, keeping leisure and commercial users safe, and protecting and enhancing the environment and promoting the use of the river for travel and trade. [www.pla.co.uk](http://www.pla.co.uk)

**For your chance to win one of six bottles of champagne and to register for the 2013-14 Cruising Guide\*, visit [www.britishmarine.co.uk/cruisingguide](http://www.britishmarine.co.uk/cruisingguide)**

Designed and produced by Leepeckgroup

## DO

- ✓ DO help to make the river an enjoyable and pleasant place to be.
- ✓ DO move up as far as possible in locks and waiting areas.
- ✓ DO be prepared to let other boats moor alongside you in busy locations whenever possible and do so as a matter of course if travelling in company.
- ✓ DO be courteous to other river users and to lock staff - treat others as you would like to be treated yourself.
- ✓ DO slow down when passing moored craft.
- ✓ DO leave lock gates and sluices set as per pedestal instructions after using locks on self-service.
- ✓ DO turn off engines when in locks
- ✓ DO check and wait for other boats in sight to arrive before closing lock gates when locks on self-service.
- ✓ DO stay alert and watchful when using locks whether manned or on self-service.
- ✓ DO assist others whenever possible - remember others – particularly holiday craft - may not be as used to using the river as you are.
- ✓ DO keep a good lookout for other boats, particularly small craft, rowers and swimmers.
- ✓ DO bin litter responsibly or take it away with you.

## DON'T

- ✗ DON'T exceed the speed limit or create excessive wash – "LOOK BEHIND YOU".
- ✗ DON'T leave large spaces at mooring sites. Be prepared to move to make better use of space when other boats arrive or leave.
- ✗ DON'T create a nuisance with loud music or other noise such as prolonged running of engines or generators.

The Thames MotorBoaters Association (TMBA), is an association of owners of powered vessels registered with the Environment Agency for use on the River Thames between Lechlade and Teddington. Further information can be found on the web at [www.tmba.org.uk](http://www.tmba.org.uk). Published by, and copyright of, the Thames MotorBoaters Association 7th January 2012
